This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

INTRODUCTION

The Index by the author was first published in the Transactions for 1895 and included the volumes from 1849 to 1894. In the Transactions for 1901, I again brought the work up to, and including 1900.

The present Index is complete, namely, from 1849 to 1907, inclusive — at which time the annual Transactions were discontinued.

There are but few complete sets of the Transactions in existence, but I think an Index of the work will be helpful. Often it is valuable to know where we can find an article even though we do not possess the special work from which we are seeking the information.

As there are not more than two or three complete files of the Transactions of the Indiana State Medical Society known to be in existence, the work possesses a rare value. Fire, and the ravages of time might easily annihilate these almost sacred writings. For this reason alone, it would seem wise to preserve in a fitting memorial volume the names of the contributors of articles as well as the titles of the several papers and reports contributed.

In these pamphlets and volumes — fifty-eight in number — extending from 1849 to 1907, inclusive, is a treasure of medical lore that the present and coming generations of medical men will do well to care for tenderly. They reach back to a period antedating our state medical journals, and I am inclined to the opinion that the early Transactions were the first medical publications in bound form issued in Indiana. *

The men who contributed the earlier articles to these Transactions have fallen asleep, and we will read no new articles from them. They were not ignorant, but observant and thinking men. They recorded facts that daily fell under their observation; and facts are always valuable.

Occasionally some of these writers would theorize and draw wrong conclusions, but when they detailed facts and history, their contributions stand as valuable work. Science comes along and pushes theories out of the way, but science never destroyed a fact, nor disturbed correct history.

A few things in these Transactions are not worth a reading at the present day, except as a curiosity, but all that has been written concerning biography, history, epidemics, and clinical cases, is well worth a reading in the twentieth century. I will venture a suggestion, namely, that a selection of articles from the Transactions, relating to the biography of early Indiana physicians, history of our primitive epidemics, details of pioneer medical practice, clinical cases, etc., might well be selected for publication in a volume as a contribution of medical literature for our State Centennial in 1916.

It seems eminently proper that the names of authors, as well as the titles of their papers should be preserved. In accordance with this idea I have prepared, with care, and much labor, an alphabetical list of every name,

* I have in my possession a small volume of 182 pages, printed at Connersville, in 1845, for Dr. Buell Eastman. So far as I have been able to determine this is the first medical book printed in Indiana. It is entitled, "Practical Treatise on Diseases Peculiar to Women and Girls." It appeals to the laity, and strictly speaking is not a professional book.

title of paper with year and page in volume where they may be found and consulted. As far as I have been able, I have secured the first and correct name of the author, residence, year of birth, and death, if not living. The names are all preserved, but in a few instances no other information can be gleaned; they probably removed to a distant state where they retired, or died, and their names do not appear in our most valuable American Medical Directory.

The titles of the papers are often suggestive of the date of writing. Articles on "Milk Sickness," will indicate the period of its prevalence. "Camp Diarrhea," is a name associated with the Civil War. Some articles are pathetic in their associations. Prof. James T. Whittaker talked earnestly to us at Lafayette, in 1898, on "Climatotherapy in Phthisis," and in less than two years from that date, fell a victim himself to the disease. Dr. James S. Gregg sat in his chair while he read his paper on "Locomotor Ataxia," in 1899, in which he referred to his own case, and died one year later from the disease. The natural history of some affections can be studied, and it is interesting to note the views held by authors of papers, in regard to tuberculosis, sixty years ago, and compare the observations made in the study of this disease from time to time in three score years.

I think it is proper at this place to call attention to the value of the obituary notices in these Transactions. These are found in the volumes from 1879 to 1907, and have usually been prepared by persons who were well acquainted with the deceased, and so, are fitting tributes to their memories. Each name can readily be found by referring to the Index printed in connection with this booklet, under the heading "Obituary." Historical societies will, in the future, refer to these for information.

An asterisk (*) is placed before the names of those known to be dead; doubtless there are others, but not having positive knowledge I prefer to leave the record as it stands.

There is a total of four hundred and eighty-one (481) names, and one thousand two hundred and two (1202) articles and reports.

As I have scanned these Transactions, the faces of men long since dead, come up before me, nay, I even seem to catch the very tone of their voices as they read or discussed various subjects. Surely, I have been fortunate to have seen and heard so many of the medical men of Indiana — two generations — those who have passed away, and those who yet mingle with us. We should revere the memories of the dead, and honor the men of this period who are doing better work by reason of education and experience.

A list of papers presented to the Indiana State Medical Society from the date of its organization to 1895, inclusive, is published in the Transactions for 1895, page 383. While this compilation unfortunately contains numerous errors, yet it will be found useful for additional reference.

A complete set of Transactions can be consulted at the Indianapolis City Library.

A final word in closing. Possibly this is my last work of magnitude for the Indiana State Medical Association. I have given a number of spare moments of the last five months to this task. Much of that time I have been in the shadow of a hospital near a sick wife who for forty-nine years was my constant gentle comrade. After I saw her no more, I continued the work, in order, as an Oriental friend of mine once expressed himself to me when he went into a retreat for nervous troubles, "That I might forget something!"

G. W. H. KEMPER, M.D.

Muncie, Ind., Jan. 25, 1915.

ALPHABETICAL LIST OF CONTRIBUTORS

1849 to 1907

A

*ADAMS, JAMES Mc., Frankfort, (1839-1888).
1871-83, Report on the prevailing diseases of the seventh congressional district; 1872-111, Report on the prevailing diseases of the seventh congressional district for 1872, (second paper).

ALEXANDER, JOHN H., Clifty, (1828).
1881-50, Trichinosis—a report of two cases.

ALLEN, HORACE R., Indianapolis, (1869).
1901-273, The treatment of Pott's disease; 1902-259, Rotaro-lateral curvature of the spine; 1904-244, Important triangles of the thigh.

*ANDREW, GEORGE L., Laporte, (1822-1911).
1879-26, Rational treatment of dysentery.

ANDREW, VIRGIL E., Cicero, (1861),
1899-186, Auto intoxication as a factor in the causation of mental and nervous diseases.

*ARTHUR, CHRISTOPHER S., Portland, (1832-1898).
1868-84, 86, Amputation of the breast. Cases in army surgery; 1893-188, Fractures of the skull with injuries to the brain; 1897-336, Retained fetus; clinical history of case—autopsy.

ARMFIELD, TILMAN O., Elwood, (1854).
1890-79, One of nature's greatest freaks —(Twins united ischiopagus).

*ARWINE, JOHN S., Columbus, (1824-1903).
1884-40, Animal or race poison.

AUSTIN, MAYNARD A., Anderson, (1876).
1900-148, Appendicitis and some appendices; 1901-219, Influenza; 1902-177, Gunshot wounds of the abdomen—report of eighteen operative cases, including one by the author, with recovery from sixteen perforations; 1905-348, The diagnosis of gallstone disease; 1906-212, Some practical points concerning certain joint injuries and diseases.

AUSTIN, WINSER, Windfall, (1841).
1882-68, An operation for ovariotomy.

*AXLINE, JOHN A., Rushville, (1847-1912).
1882-114, Diphtheria.

*AYRES, HENRY P., Fort Wayne, (1813-1887).
1859-30, Report on obstetrics; 1867-127, Epidemic dysentery in Allen County in 1845, 1854, 1856, 1864; 1868-106, Indiana's idiotic children; 1871-161, Self pollution in children; 1872-1, President's address; 1874-58, Medical history of Allen County.

B

BAILY, RACHEL S., Spiceland, (1828).
1886-172, Study of heredity in the treatment of disease.

*BAKER, MOSES, Stockwell, (1823-1888).
1885-136, Postpartum hemorrhage.

BALL, JAMES R., Lebanon, (1868).
1893-202, Acute lobar pneumonitis.

BARCUS, PAUL J., Crawfordsville, (1862).
1894-170, Summer complaint; 1895-241, Report of a case of sudden death from shock, due to the intra-uterine injection of a solution of lead acetate to induce abortion.

BARNETT, CHARLES E., Fort Wayne, (1866).
1906-81, "The female prostate"; an anatomico-surgical study; 1907-463, Report of committee on the prevention of venereal disease.

BARNHILL, JOHN F., Indianapolis, (1865).
1898-202, The causation and treatment of hay asthma; 1901-249, Some relations of the profession to diseases of the ear; 1902-142, The surgery of the mastoid region; 1905-393, The diagnosis of intracranial complications of suppurative ear diseases.

BASINGER, THOMAS W., Petersburg, (1854).
1895-95, A case of biliary calculi from birth, with leukocythemia as a complication, which resulted in death; 1897-200, Surgical treatment of internal hemorrhoids.

BATMAN, WILLIAM F., Roachdale, (1858).
1888-56, Chorea; 1895-209, Septic and pyemic fevers.

*BAYSE, THOMAS S., Spiceland, (1829-1874).
1868-74, Dislocated testis—operation for hernia.

BEASLEY, GEORGE F., Lafayette, (1841).
1883-181, Case of gunshot wound of the knee; 1893-5, President's address: The present tendency of the medical profession; 1903-32, Some things I have learned.

*BECK, JOSEPH R., Fort Wayne, (1843-1880).
1875-95, Iodide of potassium; 1880-100, 244, Tumors of the anterior wall of the vagina; Report on necrology.

*BELL, GUIDO, Indianapolis, (1839-1912).
1886-38, On washing out the stomach as a relief and cure in certain cases of obstruction of the bowels; 1893-179, On the autonomy of the heart; 1895-85, Are there blood and nerve diseases?; 1896-141, Human physiology in its relation to biology; 1897-133, A case of venesection, with remarks as to its indication.

*BELL, WILLIAM H., Logansport, (1839-1911).
1874-163, Epilepsy arising from uterine disease; 1876-70, Reflex morbid condition arising from disease of the uterus; 1882-35, The management of stillborn children after resuscitation; 1883-5, President's address: Some of the hind-

Digitized by Google

rances to the advancement of medical knowledge, and some of the methods for fostering its interests.

BERTELING, JOHN B., South Bend, (1860).
1893-163, Empyema, with report of cases; 1897-211, Nephrectomy for renal calculus; 1900-168, A plea for the more frequent use of the microscope; 1903-9, President's address: Productive scholarship as applied to the medical profession.

BLACK, JOHN P., Greenfield, (1853).
1891-241, Some forms of rhinitis which the general practitioner should be able to treat.

BLAIR, WILLIAM W., Princeton, (1827).
1878-96, An epidemic of small-pox.

*BLITZ, ADOLPH, Indianapolis, (1845-1911).
1889-143, Glaucoma; 1894-39, The prevention of blindness from ophthalmia neonatorum.

BLOSSOM, JOHN C., Mt. Summit, (1852).
1907-159, Outdoor treatment of tuberculosis.

*BLOUNT, CYRUS N., Hagerstown, (1832-1887).
1874-91, Diabetes mellitus; 1887-116, Cerebral softening, with report of a case.

*BOBBS, JOHN S., Indianapolis, (1809-1870).
1853-79, 86, 89, Cystoid tumor beneath the clavicle: its removal followed by capillary hemorrhage and death. Strangulated hernia. Encysted tumor; 1856-27, 31, Melanotic tumor of the orbit (illustrated). Operation for the relief of procidentia uteri; 1857-53, Biographical sketch of the late Dr. E. H. Deming; 1868-1, 68, President's address: The origin, objects and progress of the Indiana State Medical Society. Case of lithotomy of the gall-bladder.

BOND, CHARLES S., Richmond, (1856).
1885-78, Consumption in Indiana; 1886-89, Urea; 1887-71, Urea (second paper); 1892-66, The purpose of drugs; 1893-138, Chemistry of disease; 1894-90, Indigestion and its consequences; 1895-1, President's address: Our duty toward scientific medicine; 1901-176, Malaria in the light of recent investigation.

BORTON, T. ARTEMAS, Plymouth, (1831).
1900-105, Suggestive therapeutics.

BOSWELL, ANDREW J., Fort Wayne, (1855).
1887-161, Hay fever—its etiology, pathology and treatment.

BOWERS, GEORGE B. M., Fort Wayne, (1862).
1896-225, Purpura hemorrhagica.

BOWERS, LEORA G., Richmond, (1870).
1902-188, Plea for early operation in appendicitis; 1904-318, Intestinal obstruction, with report of cases.

*BOYD, SAMUEL S., Dublin, (1820-1888).
1874-131, Veratrum viride; 1876-23, Use of tobacco; 1877-9, President's address: Empiricism; 1884-17, Medical legislation.

*BOYDEN, CHARLES F., Evansville, (1872-1911).
1899-99, Anesthesia.

BOYDEN, WILBER A., Anderson, (1862).
1904-192, A plea for a more extended use of the active principles of drugs in the practice of medicine.

BOYERS, JAMES S., Decatur, (1852).
1902-321, Carbolic acid.

*BRAY, MADISON J., Evansville, (1811-1900).
1852-68, Dislocation of humerus; 1853-94, 96, Fibrous tumor successfully removed; Femoral hernia; 1854-25, Report on the symptoms, causes, pathology and treatment of scirrhus.

BRAYTON, ALEMBERT W., Indianapolis, 1848).
1888-112, Causation, transmission and limitation of syphilis; 1891-258, Xeroderma pigmentosum (Kaposi's disease) with presentation of the thirteenth American case, and clinical history of two cases in the same family; 1892-250, Xeroderma pigmentosum—three cases in the same family, with chromolithograph of one case presented as the frontispiece of this volume; 1902-1, Introductory remarks preceding address by Dr. Vaughan of Ann Arbor; 1905-425, The erythema group of skin diseases and their visceral lesions; 1907-35, Blastomycosis and its congeners—report of eight cases observed in Indiana

BRAYTON, NELSON D., Indianapolis, (1876).
1904-104, Syphilis considered as a non-venereal disease; 1906-57, Syphilis, past and present: its birth and origin, literature, symptomatology and curability; its relation to marriage; innocent syphilis and social prophylaxis.

*BROKAW, REUBEN E., Portland, (1868-1913).
1898-176, Inflammation from a surgical point of view.

BROSE, LOUIS D., Evansville, (1859).
1897-15, The ophthalmoscope as an aid in general medical diagnosis; 1899-322, Chronic enlargement of the tonsils.

*BROWER, JEREMIAH H., Lawrenceburg, (1798-1886).
1852-60, 63, 65, Case of compound fracture of the wrist-joint. Case of traumatic tetanus. Case of ovarian disease complicated with ascites; 1853-14, 74, Address of the President. Report of the committee on vital statistics; 1855-11, Report on the progress of medicine; 1856-56, 64, Report of the committee on vital statistics; 1860-40, Report of the committee on the progress of medicine; 1863-45, Camp diarrhoea; 1865-21, Atresia vagina from imperforate hymen.

BRUNKER, JAMES W., Riley, (1858).
1896-86, Laryngeal diphtheria.

*BRYAN, DAVID C., Indianapolis, (1861-1903).
1885-12, The pancreas.

*BRYANT, JOSEPH D., New York City, (1845-1914).
1905-24, The sunshine and shadow in medical endeavor.

BUCHMAN, ALPHEUS P., Fort Wayne, (1844).
1895-357, Gastric catarrh.

*BULLARD, TALBOTT, Indianapolis, (1815-1863).
1851-15, An address on ultraism in medicine; 1859-11, Address.

BULSON, ALBERT E., Jr., Fort Wayne, (1867).
1895-70, A case of progressive ectopia lentis, bilateral and symmetrical; 1900-

Digitized by Google

284, Eye strain; 1902-292, Some observations on intranasal surgery; 1903-266, The modern treatment of entropion; 1905-250, 475, The essentials of treatment of acute inflammation of the middle ear. Report of the proceedings of the Council.

BURCKHARDT, LOUIS, Indianapolis, (1865).
1895-342, Prognosis and therapy of the asphyxia of the new born; 1897-160, Differential indications with regard to choice of operative methods in obstetrics; 1900-45, Fever complicating the puerperium; 1902-79, The treatment of advanced cases of tuberculosis; 1907-23, Hyperemia as a remedy.

*BURKE, GEORGE W., Newcastle, (1841-1901).
1868-74, Compound fracture of the leg.

BURRAGE, SEVERANCE, Lafayette, (1868).
1900-182, The transmission of disease by flies and other insects; 1901-281, Useful bacteria; 1903-220, Some interesting typhoid and scarlet fever epidemics.

*BUTLER, DANIEL W., Dunreith, (1837-1895).
1873-51, A case of spontaneous gangrene of the leg, with arterial thrombosis, and remarks thereon.

*BYFORD, WILLIAM H., Evansville, (1817-1890).
1854-78, Report of the proceedings of the American Medical Association.

C

CANNON, JAMES H., South Bend, (1856).
1901-303, The ambulatory treatment of fractures.

CANTRALL (HAUKINS), FRANCES A., Evansville.
1897-107, Malarial fever.

CAREY, WILLIS W., Fort Wayne, (1869).
1907-411, Family history and heredity.

CARTER, AMOS, Plainfield, (1852).
1907-146, Prophylaxis and treatment of tuberculosis.

*CASEBEER, JACOB B., Auburn, (1839-1909).
1894-135, Pediatric medication.

*CASSELBERRY, ISAAC, Evansville, (1821-1873).
1852-74, Injury of the spinal column; 1855-52, An inquiry into the physiology of the organic nervous system; 1872-93, The mode in which electricity acts on the human organism.

*CHAMBERS, JOHN, Indianapolis, (1846-1892).
1877-21, Gordon's method of treatment of Colles' fracture of the radius; 1883-145, Some of the causes of cystitis in the adult male, and the treatment thereof.

CHARLES, ETTA, Summitville, (1860).
1898-243, Teratology—report of a case; 1899-69, Abnormal development; 1900-190, Infantile hysteria; 1905-188, Malignant peritonitis.

*CHARLES, HENRY, Carthage, (1822-1884).
1881-121, Tobacco and its toxic effects.

CHARLTON, FREDERICK R., Indianapolis, (1873).
1901-322, A consideration of the ureter, particularly as affected by pregnancy; 1907-321, Hypertrophied prostate—a résumé of its operative treatment.

*CHARLTON, SAMUEL H., Seymour, (1826-1897).
1887-55, Is there a "typho-malarial fever?" 1888-5, President's address.

CHITTENDEN, GEORGE F., Anderson, (1830).
1885-153, A case of compound dislocation of the knee-joint.

*CLARK, DOUGAN, Richmond, (1828-1896).
1867-116, Female doctors; 1871-29, Anesthetics in midwifery.

CLARK, EDMUND D., Indianapolis, (1869).
1905-153, Footwear and its influence on flat-foot.

CLINE, LEWIS C., Indianapolis, (1851).
1890-112, Tonsillitis; 1892-239, Surgery of the throat and nose; 1893-216, Coughs; 1895-271, Quinsy—its causes and prevention; 1897-228, The sequelae of grippe involving the accessory cavities of the nose; 1898-196, Nasopharyngitis—its causes and treatment; 1903-287, Etiology and treatment of some of the more common diseases of the upper air passages; 1904-48, Tubercular laryngitis. A plea for early recognition and treatment.

COHEN, J. SOLIS, Philadelphia, Pa., (1838).
1894-203, Guaiacol externally in tuberculosis.

*COGLEY, THOMAS J., Madison, (1814-1895).
1856-66, Address on hospitals in Europe; 1857-19, Committee on the practice of medicine.

COLE, ALBERT M., Indianapolis, (1870).
1899-89, Some pulmonary affections of children following the infectious diseases; 1904-130, The present status of the X-ray in therapeutics; 1907-8, The value of the bismuth sklagraph shadow in the clinical study of gastroptosis and enteroptosis.

*COLE, HENRY C., Kokomo, (1838-1881).
1866-100, Progress of medical science.

*COLLINS, SAMUEL H., Lawrenceburg, (1851-1915).
1886-107, Why, as a rule, does one attack of a specific disease protect from a second of the same kind? 1889-39, Yellow fever.

*COMINGOR, JOHN A., Indianapolis, (1829-1908).
1861-43, Cases reported; 1866-72, Excision of bone; 1870-127, Pathognomonic signs of nephritis.

*COMMONS, WILLIAM, Union City, (1836-1912).
1880-63, Ergot: its use and abuse; 1881-54, Trichinosis.

*COMPTON, JOHN W., Evansville, (1825-1905).
1881-18, Sanitary progress; 1882-188, Animal vaccination; 1888-75, The treatment of antepartum hemorrhage.

*CONN, ISAAC T., Evansville, (1812-1872).
1868-87, Ligation of brachial artery. Gunshot wound of lung.

CONRAD, ERNST M., Anderson, (1870).
1907-225, Infant feeding during first year.

COOK, CHARLES J., Indianapolis, (1867).
1905-282, Cholecystitis.

COOK, GEORGE J., Indianapolis, (1844).
1884-164, Pruritus ani; 1885-145, Excision of cancer of the rectum; 1902-123, Internal hemorrhoids; 1907-1, President's address.

Digitized by Google

*COOK, WARD, Pendleton, (1808-1894).
1892-142, Laceration of the perineum in parturition.

*CORNETT, WILLIAM T. S., Versailles, (1805-1897).
1850-13, An address on the rise, progress, present state and future prospects of medical science; 1852-33, Report of the committee on the practice of medicine; 1853-101, Case of gangrene of the foot from ossification of the arteries of the leg; 1874-30, Reminiscences.

COTTINGHAM, CHARLES E., Noblesville, (1868).
1900-139, Treatment of syphilis.

COULTER, STANLEY, Lafayette, (1853).
1901-287, Premedical education; 1904-62, Some later-day tendencies in medical education.

COWING, HUGH A., Muncie, (1860).
1901-192, A consideration of twins and their relation to obstetric procedures; 1906-114, The modern sanatorium treatment of tuberculosis.

COX, EDGAR, Kokomo, (1869).
1906-205, Abdominal pain.

COX, NATHANIEL D., Spencer, (1842).
1906-171, Pneumonia in the aged.

CRUM, CLAUDE C., Jeffersonville, (1878).
1907-432, Puerperal infection.

*CURRAN, ROBERT, Indianapolis, (1806-1872).
1849-10, Report on the State Medical Journal; 1852-70, Report of a case; 1853-106, Case of enlargement of the head, and delivery by the long forceps; 1872-121, Nosology of the diseases which have prevailed in Clark County, Indiana, since 1833, with remarks.

D

*DARE, JOHN S., Bloomingdale, (18 -1901).
1878-87, Nasal catarrh; 1881-110, Quinin.

*DAUGHERTY, CHARLES A. South Bend, (1850-1913).
1894-1, President's address: Remarks on some of the duties of the physician to society and to his profession; 1895-168, Exophthalmic goiter with report of cases; 1899-49, Some suggestions for the care and treatment of inebriates.

DAVIDSON, EDWARD C., Lafayette, (1867).
1899-262, Cholelithiasis.

*DAVIDSON, WILLIAM, Madison, (1810-1895).
1851-25, Report on anesthetic agents.—Chairman.

*DAVIS, LEWIS N., Farmland, (1849-1912).
1888-41, Progress, practice and obstetrical record of the country doctor.

DAVIS, ROBERT A., New Albany.
1881-66, Impaction of the gall-bladder, with discharge of 130 calculi.

*DAY, B. J., Evansville, (1822-1905).
1883-34, How cuticle is formed in sponge grafting.

*DEMING, ELIZUR H., Lafayette, (1797-1855).
1854-14, Address of the President.

DILLMAN, LURTON D., Connersville, (1845).
1907-461, Report of committee on inebriety.

*DILLS, THOMAS J., Fort Wayne, (1847-1899).
1878-92, Report of a case of Basedow's, or Graves' disease; 1884-75, Two cases of intra-ocular tumors, with remarks; 1891-204, Report of three cases of foreign bodies lodged in the eye, with comments.

DINNEN, JAMES M., Fort Wayne, (1856).
1898-278, Report of the first year's work of the Indiana State Board of Medical Examination and Registration.

*DOAN, JOSHUA M., Clayton, (1875-1902).
1897-127, Cholera infantum—its cause and treatment.

DODDS, WILLIAM T. S., Indianapolis, (1873).
1899-197, Clinical features of malaria as seen at Camp Mount Hospital; 1901-184, The parasitic theory of cancer.

DORSEY, FRANCIS O., Indianapolis, (1869).
1907-113, Symptomatolcgy and diagnosis of influenza.

DRAYER, LEWIS P., Fort Wayne, (1870).
1901-22, Diagnosis of diphtheria; 1906-108, The laboratory in the combat against tuberculosis.

DUEMLING, HERMANN A., Fort Wayne, (1871).
1896-56, Perineorrhaphy and perineoplasty.

*DUNNING, LEHMAN H., South Bend, Indianapolis, (1850-1906).
